CERTIFICAT FR07/01360U

CARTRIDGE HEATERS

Applications

- . Transformation of plastic materials, heating of packaging and thermoforming equipments
- . Heating of injection toolings, moulds, metallic masses
- . Reheating of braking systems, press plates, temperature rising of baths of mineral salts.

Applications

- . Transformation of plastic materials :
- . Mounting on pipes or barrels for extruders
- . Working of actual materials such as resins requiring high temperatures
- . Heating of conduits...

BAND HEATERS

PLATE HEATERS

Applications

- . Heating by conduction :
Heating of injection moulds, welding tools, press plates to vulcanize, extrusion lines, hoppers, tools, thermoforming, drumheating...
- . Heating by radiation :
Heating of materials in tunnels or ovens...

But also...

Flexible heaters

Immersion heaters

Cast heaters

TUBULAR ELEMENTS

Applications

- . Straight or shaped tubular elements : Heating of premises, bending of Plexiglas plates, radiation on static or moving products, temperature rising of metallic pieces...
- . Finned heaters : Used for fans, static batteries, ovens, drying tunnels...

Applications

Hot pipes and conduits, rubber, hot stamping, plastic, packaging, railway, chemistry, automobile, glass, cast, wood industries...

FORMABLE COIL HEATERS

INFRARED EMITTERS

Applications

- . Ceramic emitters : Preheating and bending of plastic, drying of textiles, papers, varnishes, paintings, pastes, aqueous solutions, ores, tobaccos, woods, resins, heating of warehouses, staff premise and breeding premises.
- . Quartz emitters : drying of paper, baking of inks, paintings and varnishes, dehydration of food products...
- . Infrared lamps : intermediary driers for silk-screen printing, heating of big volumes, fast heating of thick products...

Temperature control

Cables and sheaths

Accessories

Anything that needs to be brought up to or maintained in temperature, measured or recorded within one degree of accuracy is our concern.

For over 65 years, the electric heating is our business.

Our bandheaters, cartridge heaters, ovens, thermocouples and temperature control systems provide heating of air, water, gas, liquids, metals, chemicals, pharmaceuticals or foods...

Total quality people and know-how

From the development to the production of standard or tailor made products, the technical experience of our engineers provides you with the latest technological innovations in industrial heating.

Total quality design and production facilities

Our 17000m² (150 000sq. ft) factory centralizes all stages of the production :

- . Computer-assisted design
- . Production lines with digital driving gears.
- . Stock facilities of 2000m² (18000 sq.ft) of standard products

Total quality services

Our sales team is at your service all year round to make quotations, take orders or provide information on order progress...

Total quality production

- . Close control and selection of materials used
- . Control at all stages of the manufacturing process
- . Voluntary adoption of the European standards ISO 9001 version 2000, obtained in 2001

How to contact us ?

→ By mail : Z.I. N°1 Nétreville - 650, rue Vulcain - B.P. 1725 - 27017 EVREUX - FRANCE

→ By phone : 33 (0)2 32 62 34 20

→ By fax : 33 (0)2 32 62 34 29

→ By e-mail : export@acim-jouanin.fr
